since 1926 manufacturing
textile articles for the
hospitality industry

A track record marked by excellence in textiles for the hospitality industry

Since 1976, Resuinsa has been dedicated to the creation of high-quality textiles for the hospitality sector. Our catalogue includes products for bathrooms, bedrooms, catering and complements, designed to meet the needs of hotels, restaurants, SPAs, laundries, hospitals and nursing homes.

In addition to our outstanding line of functional textiles, we pride ourselves on being pioneers in decorative textiles, transforming spaces into welcoming and personalized environments. Our clientele spans the globe, including prestigious hotel chains, AAA Diamond Award hotels, Relais & Châteaux and Michelin-starred restaurants. We adapt to any need, whether it is technical advice, product customization or comprehensive redesign of spaces, with the ability to handle large and small orders.

As a member of Resuinsa Group, our mission is to remain at the forefront of innovation and excellence, ensuring that our products meet the highest standards and reach customers on all five continents, exceeding their expectations and needs.

After almost half a century of experience and more than 8,000 customers in 140 countries on five continents, we are publishing our 5th professional catalogue.

Aimed at all professionals in the sector, such as hotel managers, housekeepers, purchasing managers, decorators and interior designers... it contains a basic guide to the textile products that can be used in a hotel establishment.

Applicable in any country in the world, it is a great help for you to find the most common measurements in cm and inches, the weights, the qualities, the different compositions and the latest trends.

Thanks to the various lines of research and innovation that we have been carrying out for years at Resuinsa, we have increasingly sustainable products that provide solutions to the new challenges of the sector.

We are currently building a 100% circular economy for hotels with a selective collection system for textile waste at industrial level, to help you comply with regulations and take care of the planet.

I hope these pages will be of great help to you and remember to always choose quality products that respect the environment, human rights and are suitable for industrial laundering.

Finish: Stitched quilting.
Confection: Tight fitting with elastics all around.
Washable up to: 40°

Ecology

Composition fabric: 70% cotton - 30% polyester.
Composition base: Polyurethane laminate.
Composition tight fitting: 100% polyester microfiber.
Confection: Tight fitting with elastics all around.
Washable up to: 90°
Waterproof and breathable mattress protector.

Ecology Tencel Plus

Composition fabric: 100% Tencel.
Composition base: Polyurethane laminate.
Composition tight fitting: 100% polyester microfiber.
Confection: Tight fitting with elastics all around.
Washable up to: 60°
Waterproof and breathable mattress protector.

Cotton Sand

Composition terry fabric: 75% cotton - 25% polyester
Composition base: Polyurethane laminate.
Composition interior terry fabric: 75% cotton - 25% polyester.
Composition tight fitting: 50% cotton 50% polyester.
Confection: Tight fitting with elastics all around.
Washable up to: 90°

Tencel Sand

Composition exterior fabric: 100% Tencel.
Composition base: Polyurethane laminate.
Composition interior fabric: 100% Tencel.
Composition tight fitting: 100% polyester (knit).
Confection: Tight fitting with elastics all around.
Washable up to: 60°

Toppers and Topper covers

Fibra confort

Composition exterior fabric: 100% cotton twill.
Filling: 100% polyester, siliconized and conjugated hollow fiber.
Filling density: 500, 600, 800, 1.100 grs/m².
Confection: 4 elastic corner fittings.
 5cm in height with 4cm baffle boxes, finished with piping.
Color: White.

Feather-Duvet

Composition exterior fabric: 100% cotton twill.
Filling: 95% small duck feathers 30/40 mm and 5% duck down.
Filling density: 1.900 grs/m².
Confection: 4 elastic corner fittings.
 5cm in height with 4cm baffle boxes, finished with piping.
Color: White.

Viscoelastic 1,5 cm

Composition exterior fabric: 100% polyester.
Composition middle layer filling: 1'5 cm, 100% memory foam (viscoelastic polyurethane) 50 kg/m³.
Composition lower fabric: 100% cotton.
Confection: 4 elastic corner fittings.
Quilted with a button pattern and with an edge seal.
Color: White.

Viscoelastic 3 cm

Composition exterior fabric: 100% polyester.
Composition upper layer filling: 1'5 cm, 100% memory foam (viscoelastic polyurethane) 50 kg/m³
Composition middle layer filling: 100% memory foam (viscoelastic polyurethane) super soft 2 cm, 40 kg/m³.
Composition lower fabric: 100% cotton.
Confection: 4 elastic corner fittings.
Quilted with a button pattern and with an edge seal.
Color: White.

Viscoelastic 5 cm

Composition exterior fabric: 100% polyester Strech.
Filling: 5 cm, 100% memory foam (viscoelastic polyurethane) density 40 kgs/m³.
Composition lower fabric: 100% polyester Strech.
Confection: With zip and 4 elastic corner fittings.
Color: White.

Topper cover Raso

Composition: 100% sanforized cotton.
Confection: 4 elastic corner fittings.
Corners with safety stitching.
Color: White.

Basic duvet cover

Complete cover, with an inner 40 cm flap and 15 cm lateral openings at the top (hand openings).

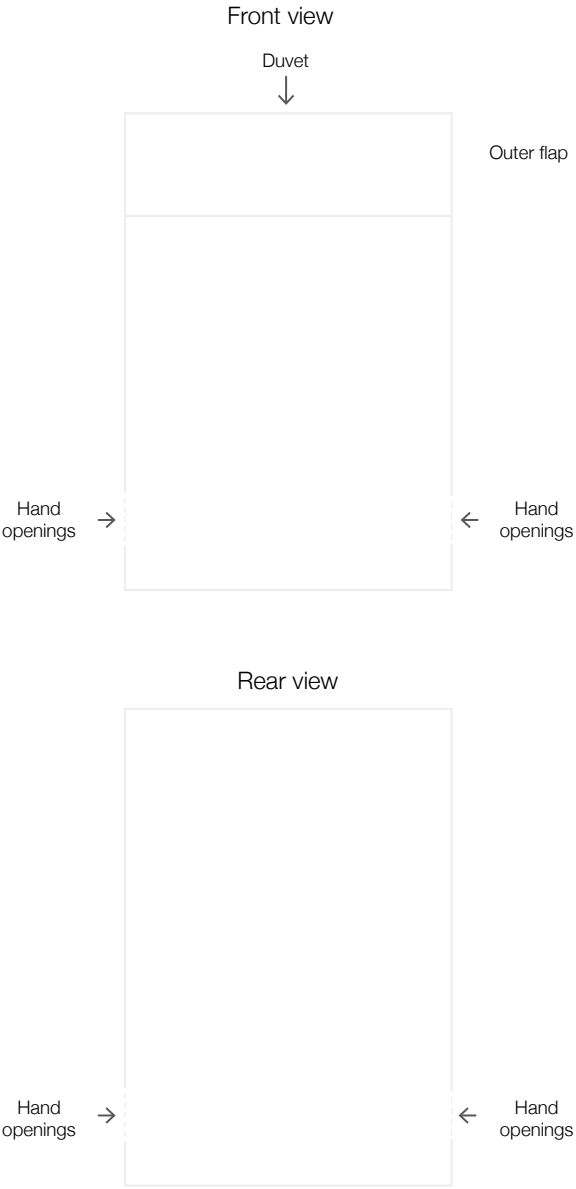

Sack-type duvet cover with narrowed opening

Complete cover with no flap (sack type) and 15 cm lateral openings at the top (hand openings)

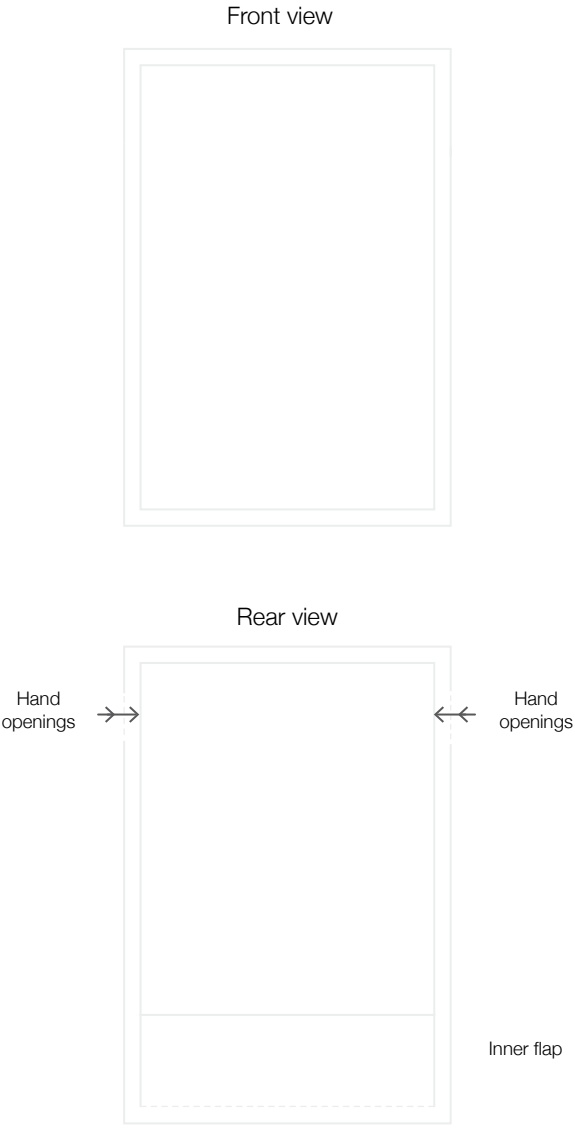

Reverse duvet cover

Complete cover, with an outer 40 cm (to fold over as if it was a top sheet) and 15 cm lateral openings at the top (hand openings).

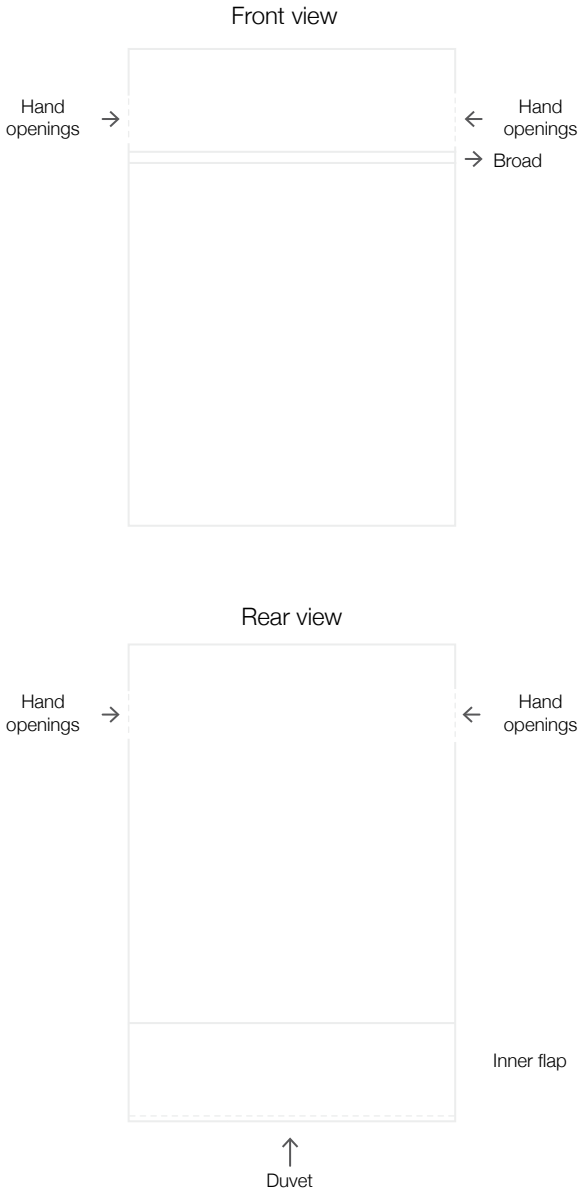

Duvet cover with ruffle

Complete cover with an inner 40 cm flap, 5 cm ruffle and 15 cm lateral openings at the top.

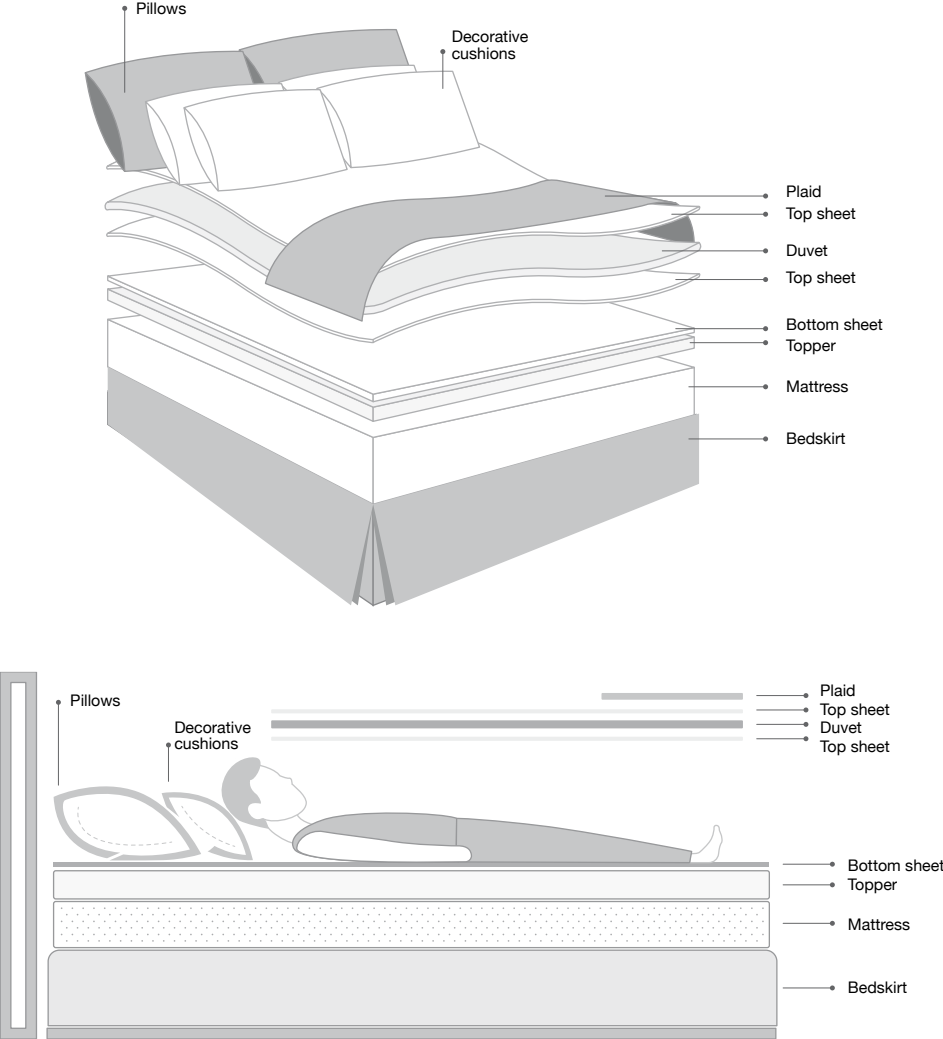

Duvet cover with top-sheet effect

Complete cover with an inner 40 cm flap, 15 cm lateral openings at the top (hand openings) and a broad 5 cm hem.

“Sandwich” bed

This is a special and practical way of assembling the bed, in which different elements are involved: on top of the fitted sheet, we put a top sheet, a duvet and another top sheet. The top part of the first top sheet is used to ‘wrap’ the rest of the items, creating an elegant bed with the practicality of having a duvet without its respective cover.

Decorative elements

Carmela Martí's decorative textiles are the perfect element to finish off the bed. To the comfort and warmth of the sheets, we add a touch of color and texture with bedskirts, plaids and cushions.

We have a wide variety of colors in each of the fabrics and we adapt to the measurements of each bed.

CERTIFICATES

STeP by Oeko-Tex®

The Sustainable Textile Production (STeP) certificate is audited and issued by the International Oeko-Tex® Association. It certifies sustainable production through the implementation of processes that respect the environment, health and safety, as well as guaranteeing optimal working conditions. It covers all stages of the production process, from spinning to manufacturing, giving Resuinsa the highest level of sustainable production. Through STeP by Oeko-Tex®, we offer our customers official reports on the carbon and water footprint of our production process.

Oeko-Tex® Standard 100

Since 1998, we have annually renewed the Oeko-Tex® Standard 100 Certificate, a global system of independent testing and verification that guarantees that our textile products, in contact with the skin, are free of substances that are toxic to the health of the user.

GOTS (Global Organic Textile Standard)

GOTS is the world's leading standard for the processing of textiles made from organic fibers. It includes ecological and social criteria supported by independent certifications throughout the entire textile manufacturing chain. It certifies that the cotton used originates from organic agriculture.

FAIRTRADE®

The FAIRTRADE® label guarantees that our products comply with fair trade standards, fighting poverty, inequality, injustice, protecting the environment and combating climate change.

R D I

HOTEL CIRCULAR ECONOMY

In view of the European Directive EU 2018/851, which requires the collection and management of textile waste from 2025, Resuinsa has developed an R&D&I project in collaboration with the CDTI - Centre for Technological Development and Innovation.

This project makes it easier for hotels to manage textile waste, reincorporating it into the value chain and promoting a 100% hotel circular economy.

We offer innovative and sustainable solutions that benefit both our environment and our customers, moving towards a more sustainable future for society as a whole.

SMART TEXTILES

The management of smart textiles through the cloud is a reality. We have our own software, RESUINSA CLOUD, which offers our customers a cloud-based solution for the RFID technology incorporated in the garments and is fully compatible with any other management software used.

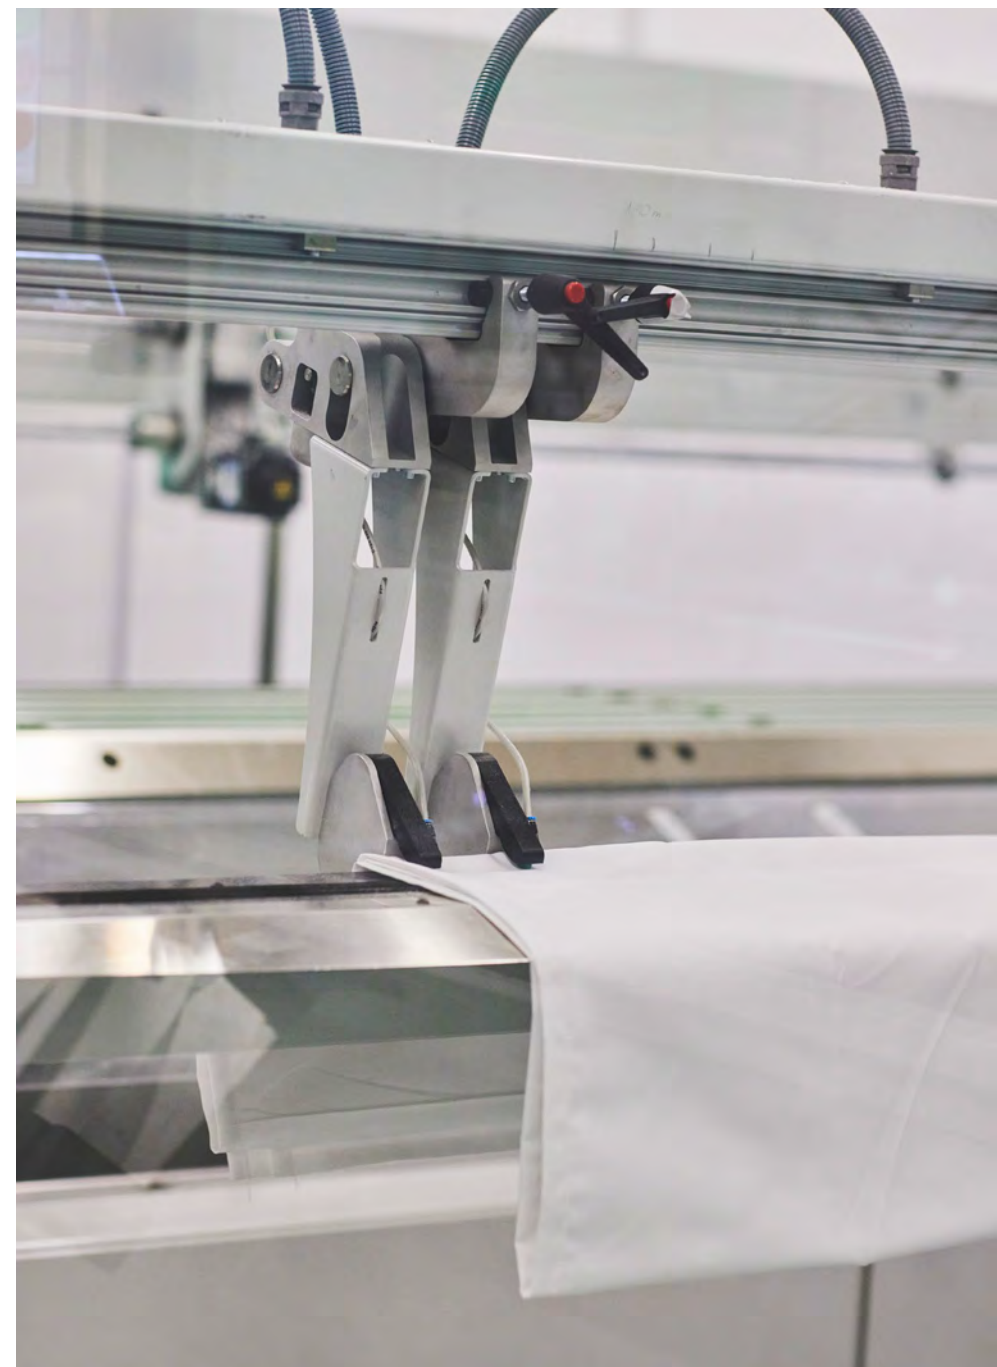

The garments are assigned from Resuinsa's facilities, directly to the customer, who receives specific training on the use of the platform. By means of a tag-tag, RFID technology facilitates the management of the traceability of articles in inventory processes, location, knowledge of their useful life, collection, distribution and internal washing processes. All this data is stored in an orderly fashion in the Resuinsa Cloud so that it can be accessed directly at any time and from anywhere.

TEXTILES SUITABLE FOR INDUSTRIAL WASHING

Textiles that are subjected to industrial laundering must be highly resistant and be able to maintain their qualities over time. The washing process involves many aggressive factors for the garment, such as the detergents and chemicals used in the process, the washing temperature, drying, calendering and pressing, among others.

In order to guarantee the resistance of the fabric, Resuinsa has a quality certificate for textile products suitable for industrial washing, which guarantees criteria such as resistance to traction, lamellar mass, absorption capacity, degree of whiteness and degree of polymerization (DP). It is the first company in the world to obtain it, anticipating the needs of the sector and placing itself at the forefront in terms of R&D&I in textiles.

CSR

At Resuinsa, our Corporate Social Responsibility (CSR) strategy is aligned with the United Nations **Sustainable Development Goals (SDGs)**, adopted in the 2030 Agenda.

We consider CSR to be a comprehensive commitment to society and the environment, based on a responsible business model that seeks to contribute to a fairer and more equitable society.

We are firmly committed to a **sustainable planet**, integrating environmental care in all our production processes and in all areas of the company. Since 2010, our boxes have been made from recycled materials and are fully recyclable. In 2019, we reinforced our environmental commitment by reducing the use of plastics by 60% through the modification of our packaging system.

As of 2020, we are part of the **United Nations Global Compact**, the world's largest corporate sustainability initiative with more than 12,500 entities in over 160 countries. Our dedication and commitment allow us to innovate and lead projects that generate value in society, promoting a more responsible and sustainable world.
